**Section B: Comparison with IGCSE Results**

This section looks at the most common relationships between students IGCSE grades and their IB results. The numbers represent percentages. Thus, in the table showing the Standard level results, the number 13.3 at the top of the table means that 13.3% of students who received a ‘A\*’ grade in their IGCSE exams ended up receiving a grade 5 in the equivalent IB subject in 2009. Again, the darker the shade colour, then the stronger the relationship between the IGCSE result and the IB result. The key is shown below.
